Nicolas Chabbert's viewpoint: A promising New Year!

This past year – the first with a two-model family in the catalog – has been remarkably good for our TBM very fast turboprop. On the sales front, 54 airplanes produced and delivered: two more than initially scheduled. We saw our sales double in Europe, paced by an impressive performance in the U.K., thanks to the actions of our new distributor, Flying Smart.

From the Factory:

TBM Pilot Profile: Howard Janzen, SN1026

Could you describe your professional activity, and how it relates to your interest in aviation?

I am involved in leading a high-tech start-up company with offices in Colorado and California, along with geographically diverse business connections.

I have some small business interests in Oklahoma, and we have grandchildren located there. I also serve on public company boards

located on the U.S. East and West Coasts. This all adds up to significant travel demands, which the TBM makes possible to meet with ease. (...)

TBM Upgrade catalog

The TBM Upgrade catalog is a useful guide to upgrades proposed for TBM customers.

It gives a direct access to the available upgrades based on aircraft type.

Once the type is selected, its TBM validity can be determined by aircraft serial number, the reference to be ordered and the recommended labor hours.

Prices for upgrade kits are available via the on-line price list at: www.MySocata.com

Labor hours are additional.

Special Offer
