## From the Factory

### Dear TBM enthusiast,

With the summer season now in full swing, we are looking forward to the next EAA AirVenture Oshkosh definitely *the* place to be, as it is considered by an increasing number of TBM pilots as an indispensable part of the TBM experience. Therefore, we expect to welcome a large number of TBMs flying into Wisconsin's Wittman Regional Airport for an event that has truly earned its reputation as the world's greatest aviation celebration.

With such a turnout of the TBM community, and thousands of other attendees joining them, EAA AirVenture definitely is the right venue to present the "Elite Privacy" for TBM aircraft - a new cabin configuration that includes an optional fully stowable lavatory compartment. This enhancement should especially please travelers on longer-range flights, and will be available in 2017 on new TBM models.

At Oshkosh, we also will be talking about some very good news on the regulatory side, with the European Commission's go-ahead for single-engine turboprop commercial air transport. This decision, which has been fully supported by Daher, will open new TBM business opportunities in Europe, while also further encouraging TBM charter operations in countries that already allow such commercial flights - such as the U.S.

Adding to the festivities at EAA AirVenture will be the EAA/Daher Young Eagles International Internships 10th year celebration. This program has enabled a total of 20 U.S. students to obtain first-hand experience with the international aircraft sector - positioning these promising young people as potential future decision-makers in our industry.

Dear CAMP users : in order to obtain the full benefit of your service, the flight hours update may be easily done via your smartphone:

- 1 – Download the Apple App: [Icamp](#) from App Store or
- 2 – Connect to [icamp.campsystems.com](http://icamp.campsystems.com) via your browser

Use your log-in in and password that CAMP systems provided to you at aircraft delivery.

Thank you for helping us.

## TBM Pilot Profile – Dr Ian B. Fries, SN1012

Once again, Dr. Ian B. Fries and his "golden" TBM 900 will be our guests at EAA AirVenture this year. Oshkosh visitors will be able to talk to him about culture, aviation, and medical topics, as he worked with Dr. Buza to develop the hypoxia training program specifically for TBM owners that was introduced last year. (...)

## Videos

### Principles of flight - Part 1 : Fundamentals

This video is part of the communications channel from Daher to TBM operators, pilots, training institutions, instructor pilots, mentors, and safety pilots.

The aim is to enhance the pilot's situational awareness when flying the TBM. At no time does this information replace the procedures within any aircraft's Pilot Operating Handbook (POH) or Pilot's Guide (PG).

## History

## Temple Joyce and the Morane-Saulnier Type AI

In January 1919, U.S. Army Air Service test pilot Captain Temple N. Joyce performed 300 consecutive loops in the skies above Issoudun, France, flying a MS 30 fighter trainer built by Morane-Saulnier a predecessor company to Daher. This was no stunt performed by a crazy pilot, but rather a demonstration of excellent pilot skills and a solidly-built aircraft.. (...)
