

Pilot door handle retrofit

Enjoy the latest enhancement for your TBM

Pilot door pushbutton and handle replacement

Is your TBM aircraft giving you “the cold shoulder?”

A new pilot door handle and pushbutton built with carbon composite materials are now available for retrofit on TBM aircraft.

It does not radiate the same sensation of cold as a metallic door handle.

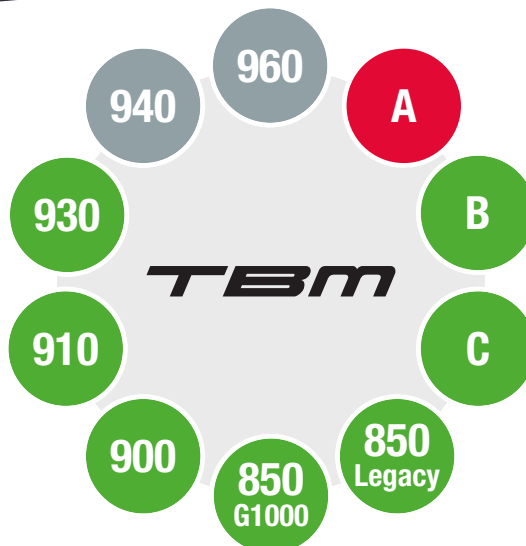

The result: increased comfort during flight, and reduced heat loss.

Validity

Up to SN 1269
equipped with pilot door
